PROFILE

Computer Science students, I interested both in back-end and front-end technologies, knowledgeable with JS, CSS, HTML, Python. Also, in the field of cybersecurity, knowledgeable with information gathering and vulnerability detection. I wish obtain a challenging and rewarding position as a computer scientist, utilizing my strong technical skills and passion for innovation to contribute to the development of cutting-edge software systems and solutions.

EDUCATION

Bachelor of Computer Science – Jazan University   May 2021

- Training :
  Website development

- Final Project :
  Dashboard for analyzing the content in twitter.
  In this project, we have built a dashboard that enables the user to track and analyze what is in trends at the current time, as well as analyze contents. The dashboard will provide the user with detailed information. It will also provide high-level interactive charts and geographical maps. Tools and techniques used: Data Visualization, PyCharm, Python, Flask, HTML, CSS, JavaScript, Twitter API.
